SUMMARY

Software Developer with hands-on experience in Java and Python, with practical exposure to APIs, databases, application development, testing, and debugging. Experienced in building software projects and AI-based applications with strong problem-solving skills. Quick to learn new technologies and interested in API integration, automation, and reliable software solutions.

SKILLS

Programming Languages: Java, Python, JavaScript, HTML, CSS.
Java & Backend: Core Java, Object-Oriented Programming, REST APIs, JSON.
Databases: MySQL, MongoDB, SQL.
Web Technologies: HTML, CSS, JavaScript.
Testing & Debugging: API Testing, Debugging, Problem Solving.
Developer Tools: Git, GitHub, VS Code, Bugzilla.
Core Concepts: Data Structures & Algorithms, Database Management, Software Development.

PROJECTS

Fake-Review Detection GitHub

- Built a fake review detection system using NLP and machine learning to classify reviews as genuine or fake.
- Performed data cleaning, exploratory analysis, feature extraction with TF-IDF/CountVectorizer, and trained multiple models like Logistic Regression, Naive Bayes, Decision Tree, and Random Forest.
- Improved the project with a DistilBERT-based deep learning model and compared performance using accuracy, confusion matrix, and F1 score.

StudentHolic AI – AI-Powered Content Creation Platform GitHub

- Built an AI-powered platform that generates short videos from text prompts by coordinating script generation and media processing workflows.
- Integrated APIs and a PDF-to-script workflow to process study materials into structured, video-ready content.
- Developed a Telegram bot to automate media delivery and connect different application components.

Courier Management System GitHub

- Developed a Courier Management System for parcel booking, tracking, and status management.
- Implemented customer and administrator functionalities for managing shipments, delivery updates, and parcel records.
- Designed SQL database operations to store, retrieve, and update parcel and transaction information.

EDUCATION

ACS College Of Engineering, Bengaluru Dec 2022 – Jun 2026
B.Tech in Computer Science and Engineering | Percentage: 90

OPEN SOURCE CONTRIBUTION

- Authored and merged multiple conformance tests for HTML & CSS into the Web Platform Tests (WPT) project, the official standards suite used by Google, Mozilla, and Apple.
- Identified and submitted a detailed bug report for a CSS Flexbox rendering issue in the Mozilla Firefox browser, providing a reproducible test case to core engineers on Bugzilla (Bug 1986522).

CERTIFICATES & AWARDS

- **Participant**, Google Hackathon, focusing on collaborative development and competitive problem-solving.
- **Career Essentials in Generative AI** (LinkedIn Learning) | **Core Java** (Coursera) | **Computer Networks** (NPTEL) | **Database Management** (Infosys Springboard)
